

PSCN020-02P Pancake Slip Ring

The separate slip ring also called two half style slip ring, consists of separated rotor and contact brush, with many features, low resistance, easy to install, simplify system design, eliminate possible damage while rotation, suitable for small space etc.

Features

- ◆ Extremely thin, save space
- ◆ Separate rotor and stator
- ◆ PCB material

Applications

- ◆ Display case
- ◆ Yacht
- ◆ 3D total station

Optional

- ◆ Lead wire length
- ◆ Installation way
- ◆ Current rating

PSCN020-02P	Specification	Picture
Current	2*3A	
Rating voltage	0~24 VAC/VDC	
Dielectric strength	≥300VAC@50Hz	
Insulation resistance	300MΩ@300VDC	
Electrical noise	≤30mΩ (50rpm)	
Working speed	0~3rpm	
Contact material	precious metal	
Housing material	FR-4	
Working temperature	-20℃~+60℃	
Working humidity	60%RH	
Inner diameter	Ø20mm
